WELCOME MESSAGES

Dear EUGA members and friends,
it is my great pleasure to welcome you all to the 2019 EUGA Annual Congress in Tel Aviv. It is the first congress of my presidency of EUGA and I am especially proud because our association has been growing steadily and it now has more than 4500 members. The Scientific Committee headed by Michele Meschia has spent a great deal of time preparing this year's programme, which is of outstanding scientific level and will see the participation of worldwide renowned speakers. We are expecting to receive a large number of abstracts and are confident that their scientific level will contribute to enriching the programme, which will also include several interesting workshops. We are particularly happy to be hosted by our Israeli affiliates and count on their proverbial efficiency so that all of you feel welcome and relaxed.

I look forward to meeting you in Tel Aviv.

Stavros Athanasiou
EUGA President

Dear Colleagues,
It is my great honour and pleasure to invite you to the forthcoming 12th EUGA annual meeting that will be held in Tel Aviv on October 16-18, 2019. Apart from the interesting, innovative, important and scientific content, you will have an opportunity to see and taste the diverse and beautiful flavours of Israel.
Tel Aviv is the beating heart of Israel and UNESCO has designated the "White City architecture" of Tel Aviv as one of 24 new World Heritage Sites.

It is therefore our privilege to host EUGA conference in Tel Aviv. The conference will include an interesting, innovative and stimulating scientific program with the aim to make you familiar with the fascinating and inspiring atmosphere of Tel Aviv and the holy land.

The EUGA annual meeting is really a special scientific event, with its own unique culture and focus. The essence of this meeting is to allow European urogynecologists to share and exchange ideas and present different approaches to the pelvic floor pathologies we deal with every day, while spending enjoyable moments with friends and colleagues. There will be a wide offer of workshops on timely topics to enhance your practice. Abstract and video sessions have been scheduled during the meeting with podium presentations and posters, giving researchers the opportunity to discuss scientific results with the audience.

We look forward to seeing you in Tel Aviv to present your research, participate in scientific debates, mingle with colleagues and friends and have an enjoyable time.

Shimon Ginath

DISCUSSING THE ROOT-CAUSE OF MESH RELATED COMPLICATIONS

Following the FDA announcement this year, to cease sales of transvaginal implants that could not demonstrate favorable benefit-risk profile compared to Native Tissue Repair, it is time for a thorough discussion about the root causes of mesh complication. This symposium will discuss the role of mesh anchoring techniques and graft material in mesh complications. Understanding the root cause of these complications has led to the development of a new vaginal implant. The symposium will include scientific review, clinical data and surgeons experience presented by experienced pelvic surgeons.

Chairman: Mauro Cervigni

Participants: Eric Bautrant, Gerald Staudenmaier, Gil Levy

Presentations:

1. The biomechanics of vaginal implant – Mauro Cervigni

2. The anchorless concept – Gil Levy
